

NEDGRAPHICS' SUCCESS STORIES

Dyefin Textiles

About

Established in 1989 and now located in Durban, South Africa, Dyefin Textiles specializes in dyeing and finishing knitted and woven fabrics made out of cotton, viscose, polyester and nylon plus their blends.

The company offers both pigment and reactive printing alongside stock and bespoke design services through their in-house design studio. For creative design services, Dyefin Textiles uses the latest NedGraphics Printing Studio solution.

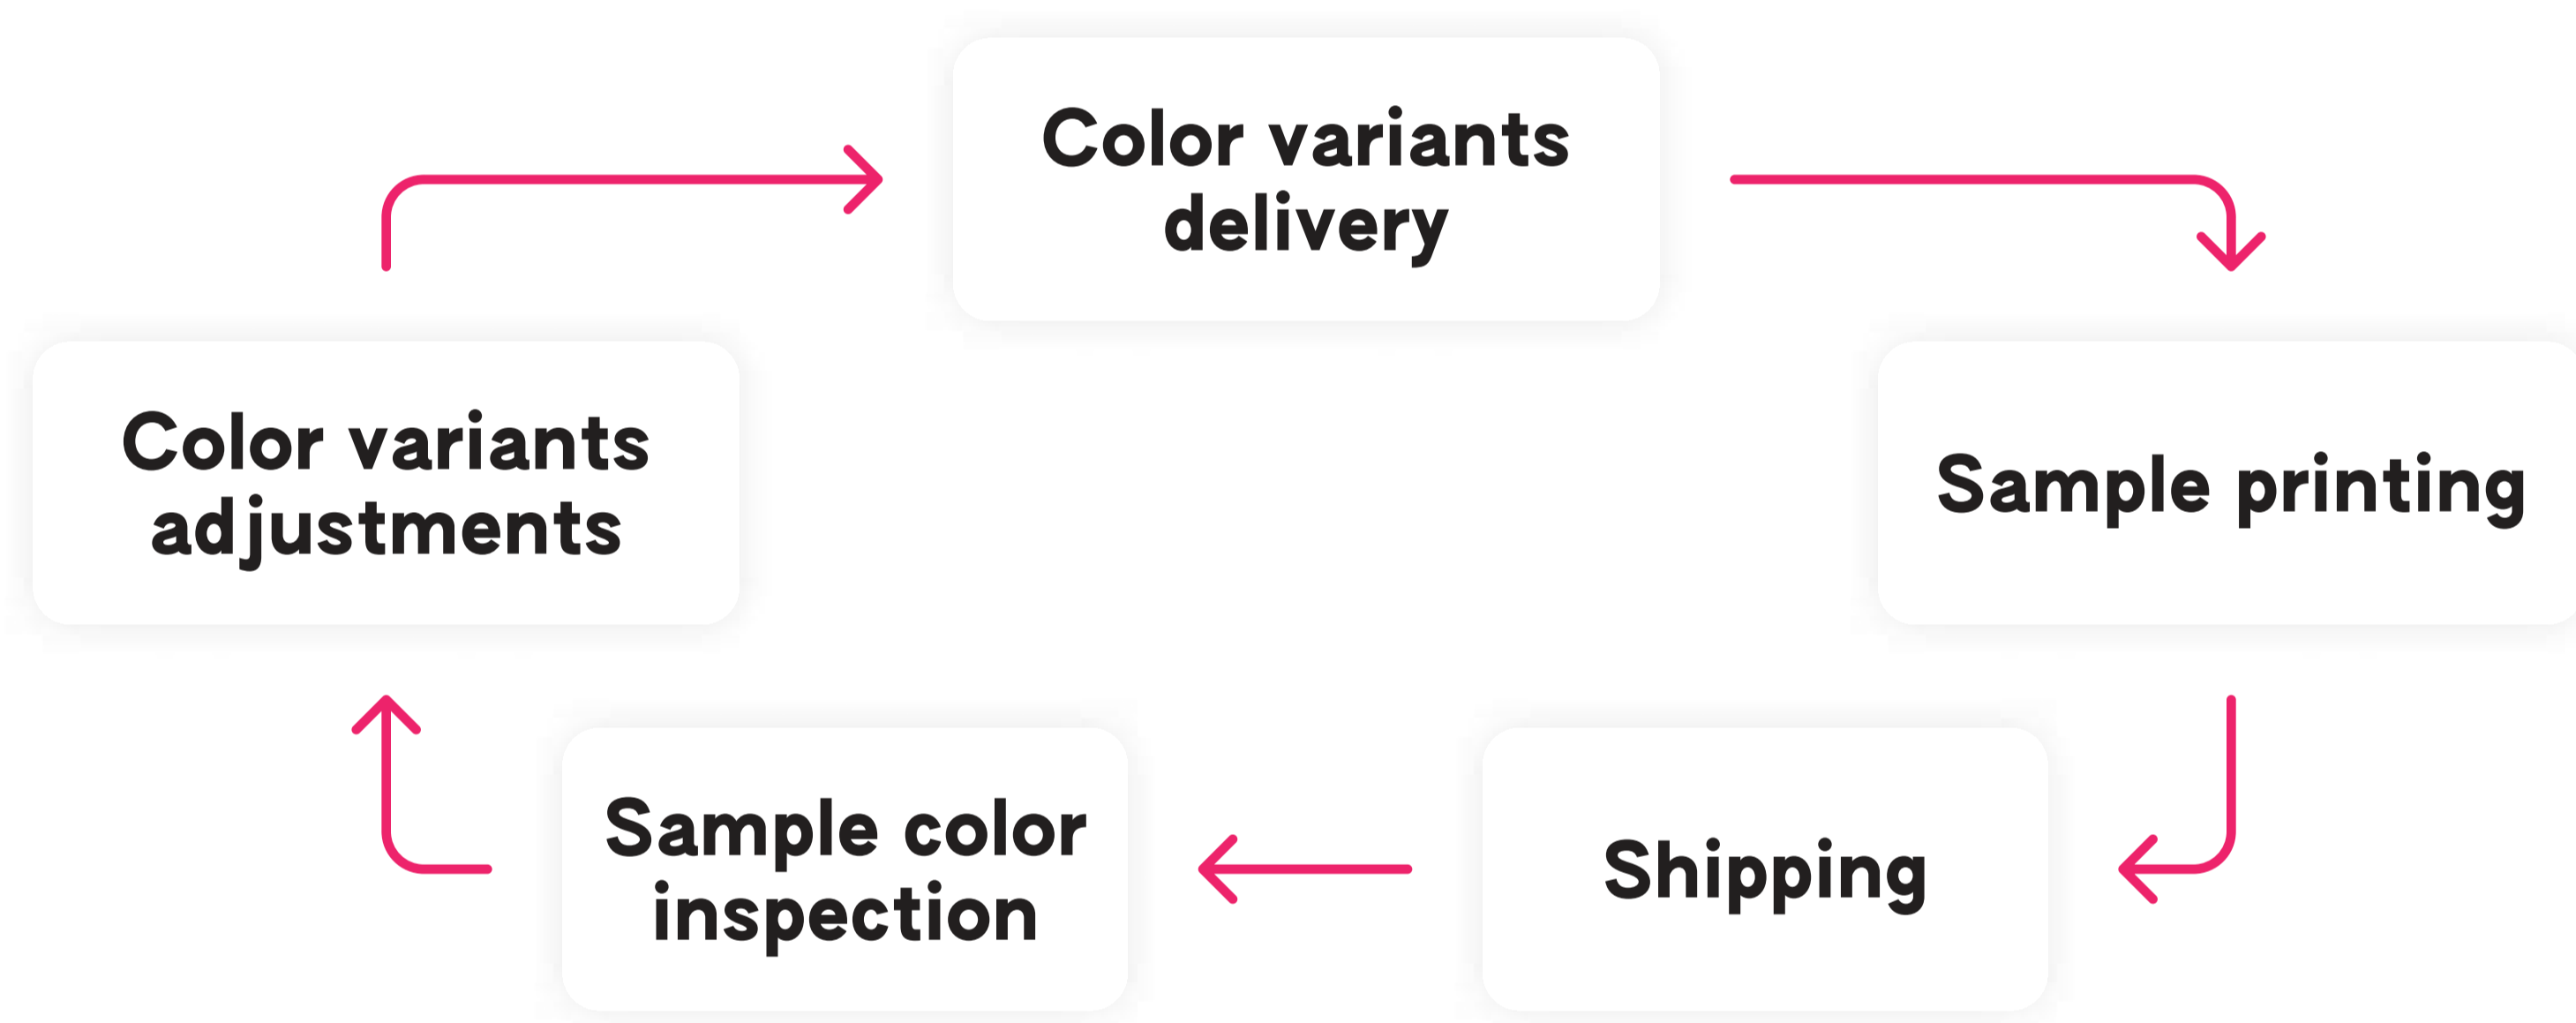

Business Goals

Dyefin Textiles is the company that prints the designs for the country's leading independent retail groups on printing machines. The businesses have been using NedGraphics' Printing Studio for years, easily modifying designs while leveraging tools for fast color reduction and cleaning.

Since the businesses are located in different cities, they needed color communication support to improve their workflow efficiency and enable the visualization of the final product during the design stage.

The Vicious Circle Of Color Matching

Business Challenges

Dyefin Textiles faced challenges in achieving consistent colors between those seen on screen and those produced on the printing machines. This led to uncertainty in predicting how patterns would appear on different fabrics and printers. Creating unique patterns and prints with accurate color reproductions required a high level of attention to detail.

Additionally, achieving consistency in color harmony in the production of seasonal collections required a significant investment of time and resources for the country's leading retail and garment companies for which Dyefin made their fabric prints. It was also important for these companies to see their pre-production designs in the right colors at Dyefin Textiles. It was vital for all companies to use correctly calibrated screens and printers to build confidence in the final products produced by Dyefin Textiles, which would be the same as those envisioned by the clothing manufacturers' design teams.

Color Printing Issues

Inaccurate Color Combinations

Screen Calibration Failures

The NedGraphics Solution

NedGraphics calibrated Dyefin Textiles' digital print machines, screens and printers to ensure consistent and accurate color communication. This was achieved through the implementation of its Color Calibration solution, which enabled accurate color capture across devices for screen, paper and fabric printing.

Consistent Color Output

Accurate Color Capture

Predictable Pattern Outcomes

Results

The NedGraphics Color Calibration solution was also applied to the retail companies screens and printers, which achieved the same calibration values as Dyefin Textiles.

The calibration of four different fabric types also eliminated the need for guesswork when reproducing patterns on different fabrics and printers. NedGraphics helped businesses save time and costs while

Eliminated Color Guesswork

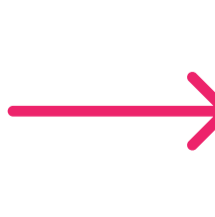

Increased Designer Productivity

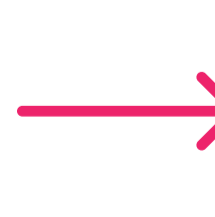

Reduced Paper and Ink Waste

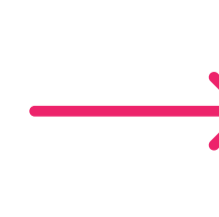

Color variants delivery

Accurate Color Sample Printing

Save time and Reduce Costs

Happy Customer

About NedGraphics

NedGraphics is a leading developer of CAD software solutions created specifically for apparel and retail, home furnishings, flooring design and various other textiles. NedGraphics products allow designers to exercise full creative freedom while improving efficiency, productivity and accuracy to create production-ready artwork.
