

NedGraphics Knit for Adobe® Illustrator: Revolutionizing Knit Design

From Stitches to Masterpieces: Transforming Knit Design with Ease

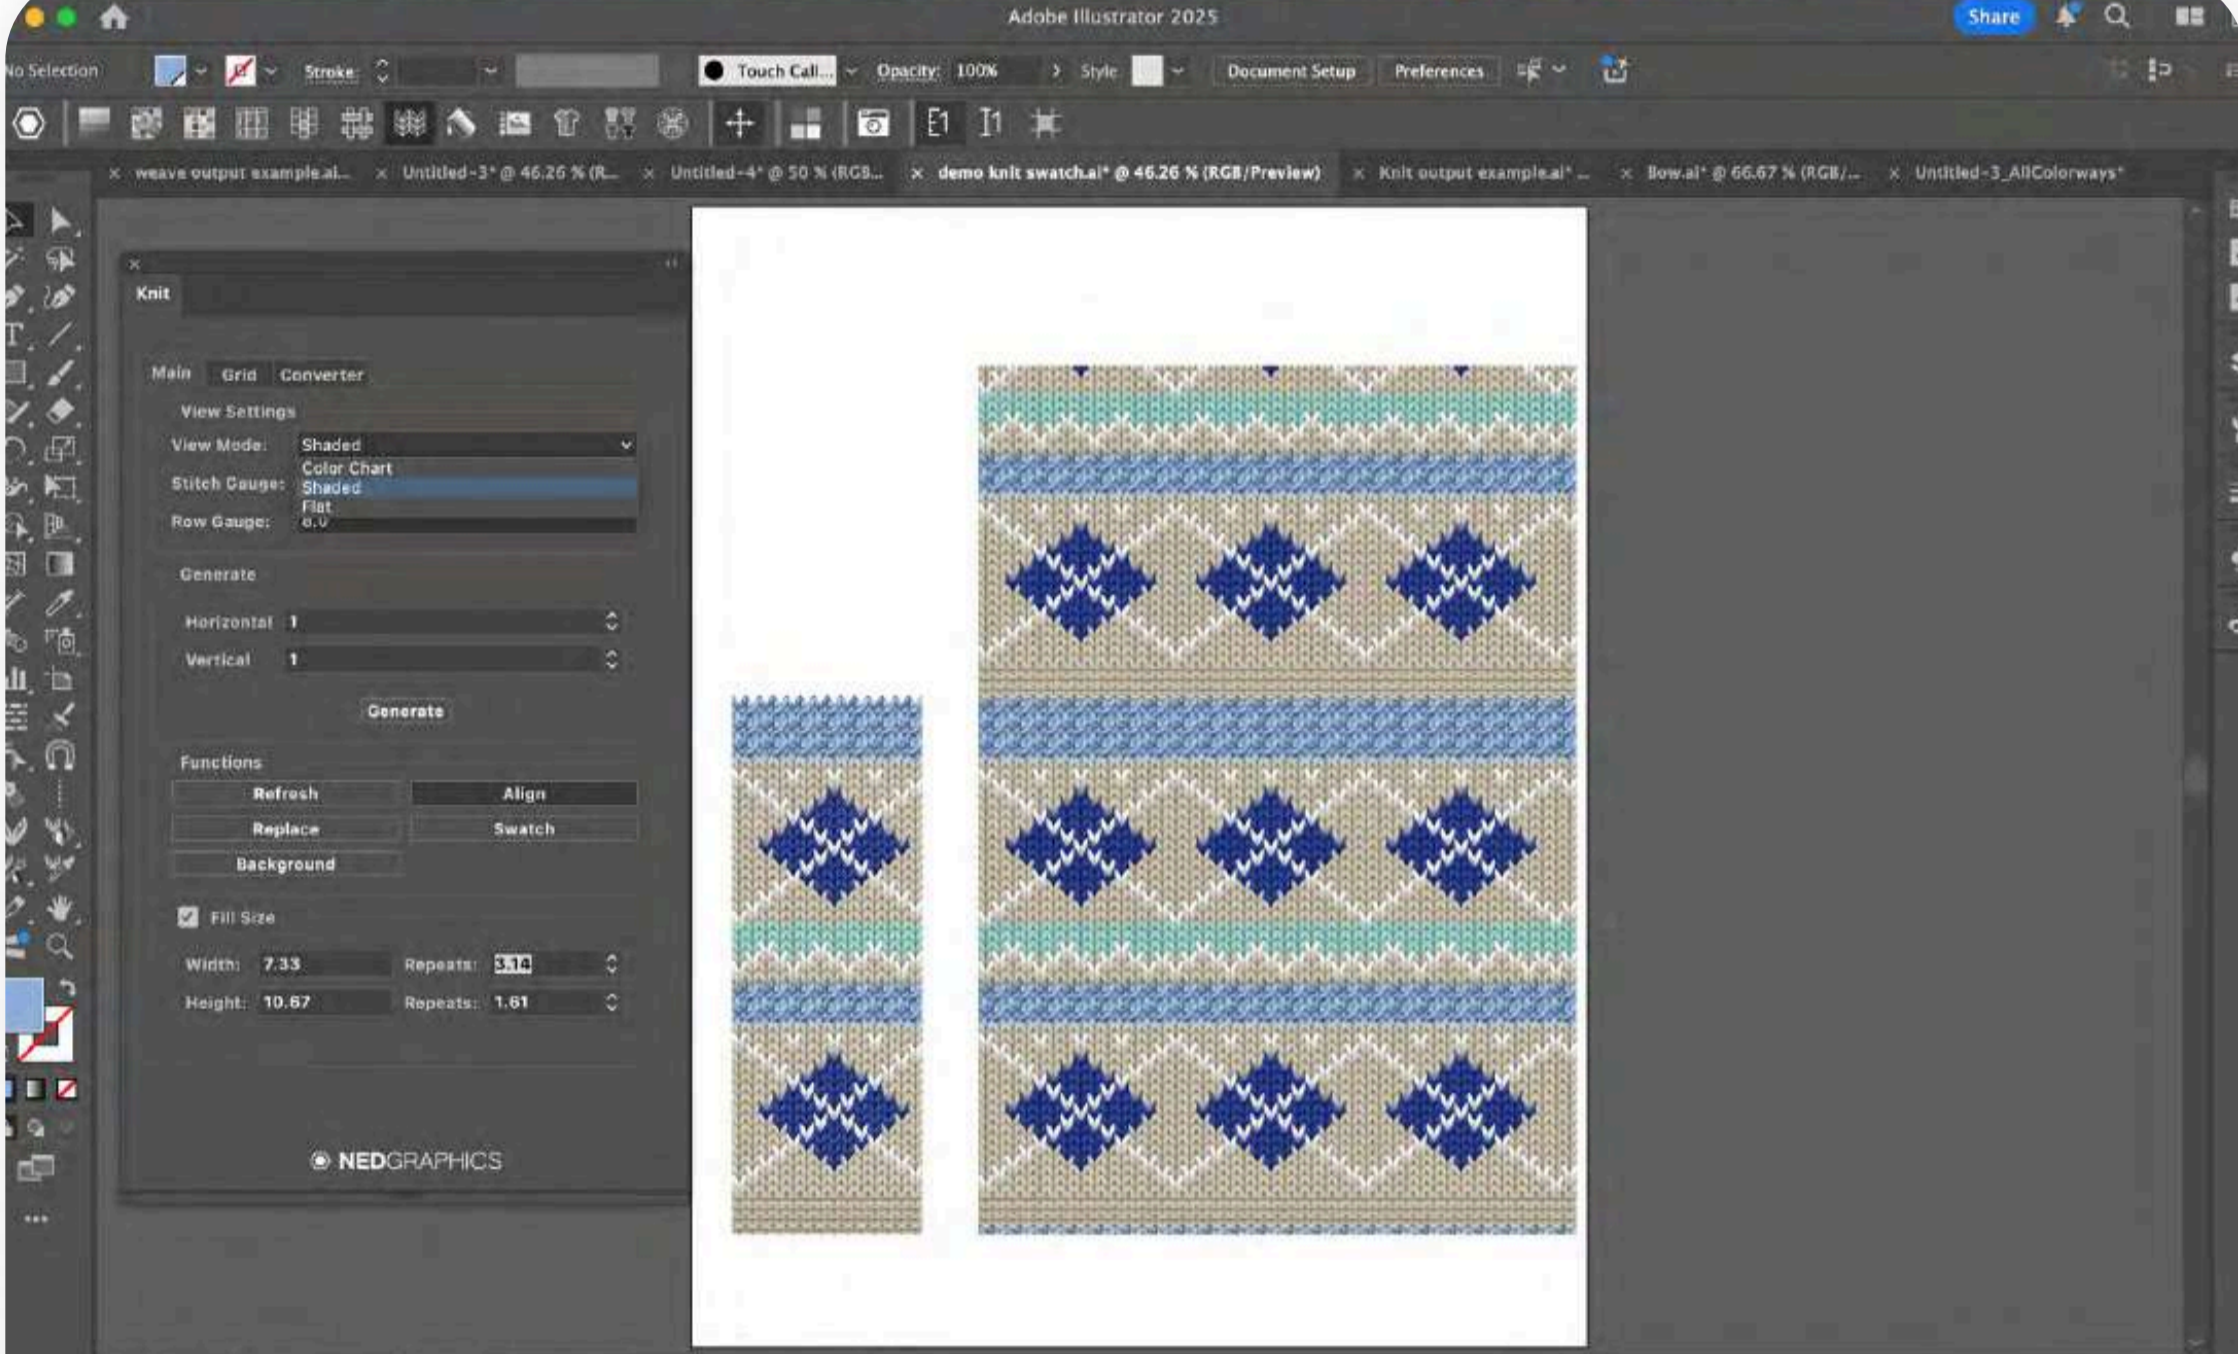

Designing knit patterns is an intricate process that requires precision. Adobe Illustrator is a versatile tool for knit designers, but when it comes to creating complex Fair Isle patterns, unique stitches, and multiple colorways, the manual approach can be time-consuming and challenging. Enter the **NedGraphics Knit for Adobe Illustrator**, a workflow solution that transforms Illustrator into a specialized tool for knit design.

From building stitches to creating intricate patterns and colorways, the Knit streamlines workflows, saving designers hours of repetitive work while enhancing precision and creative potential.

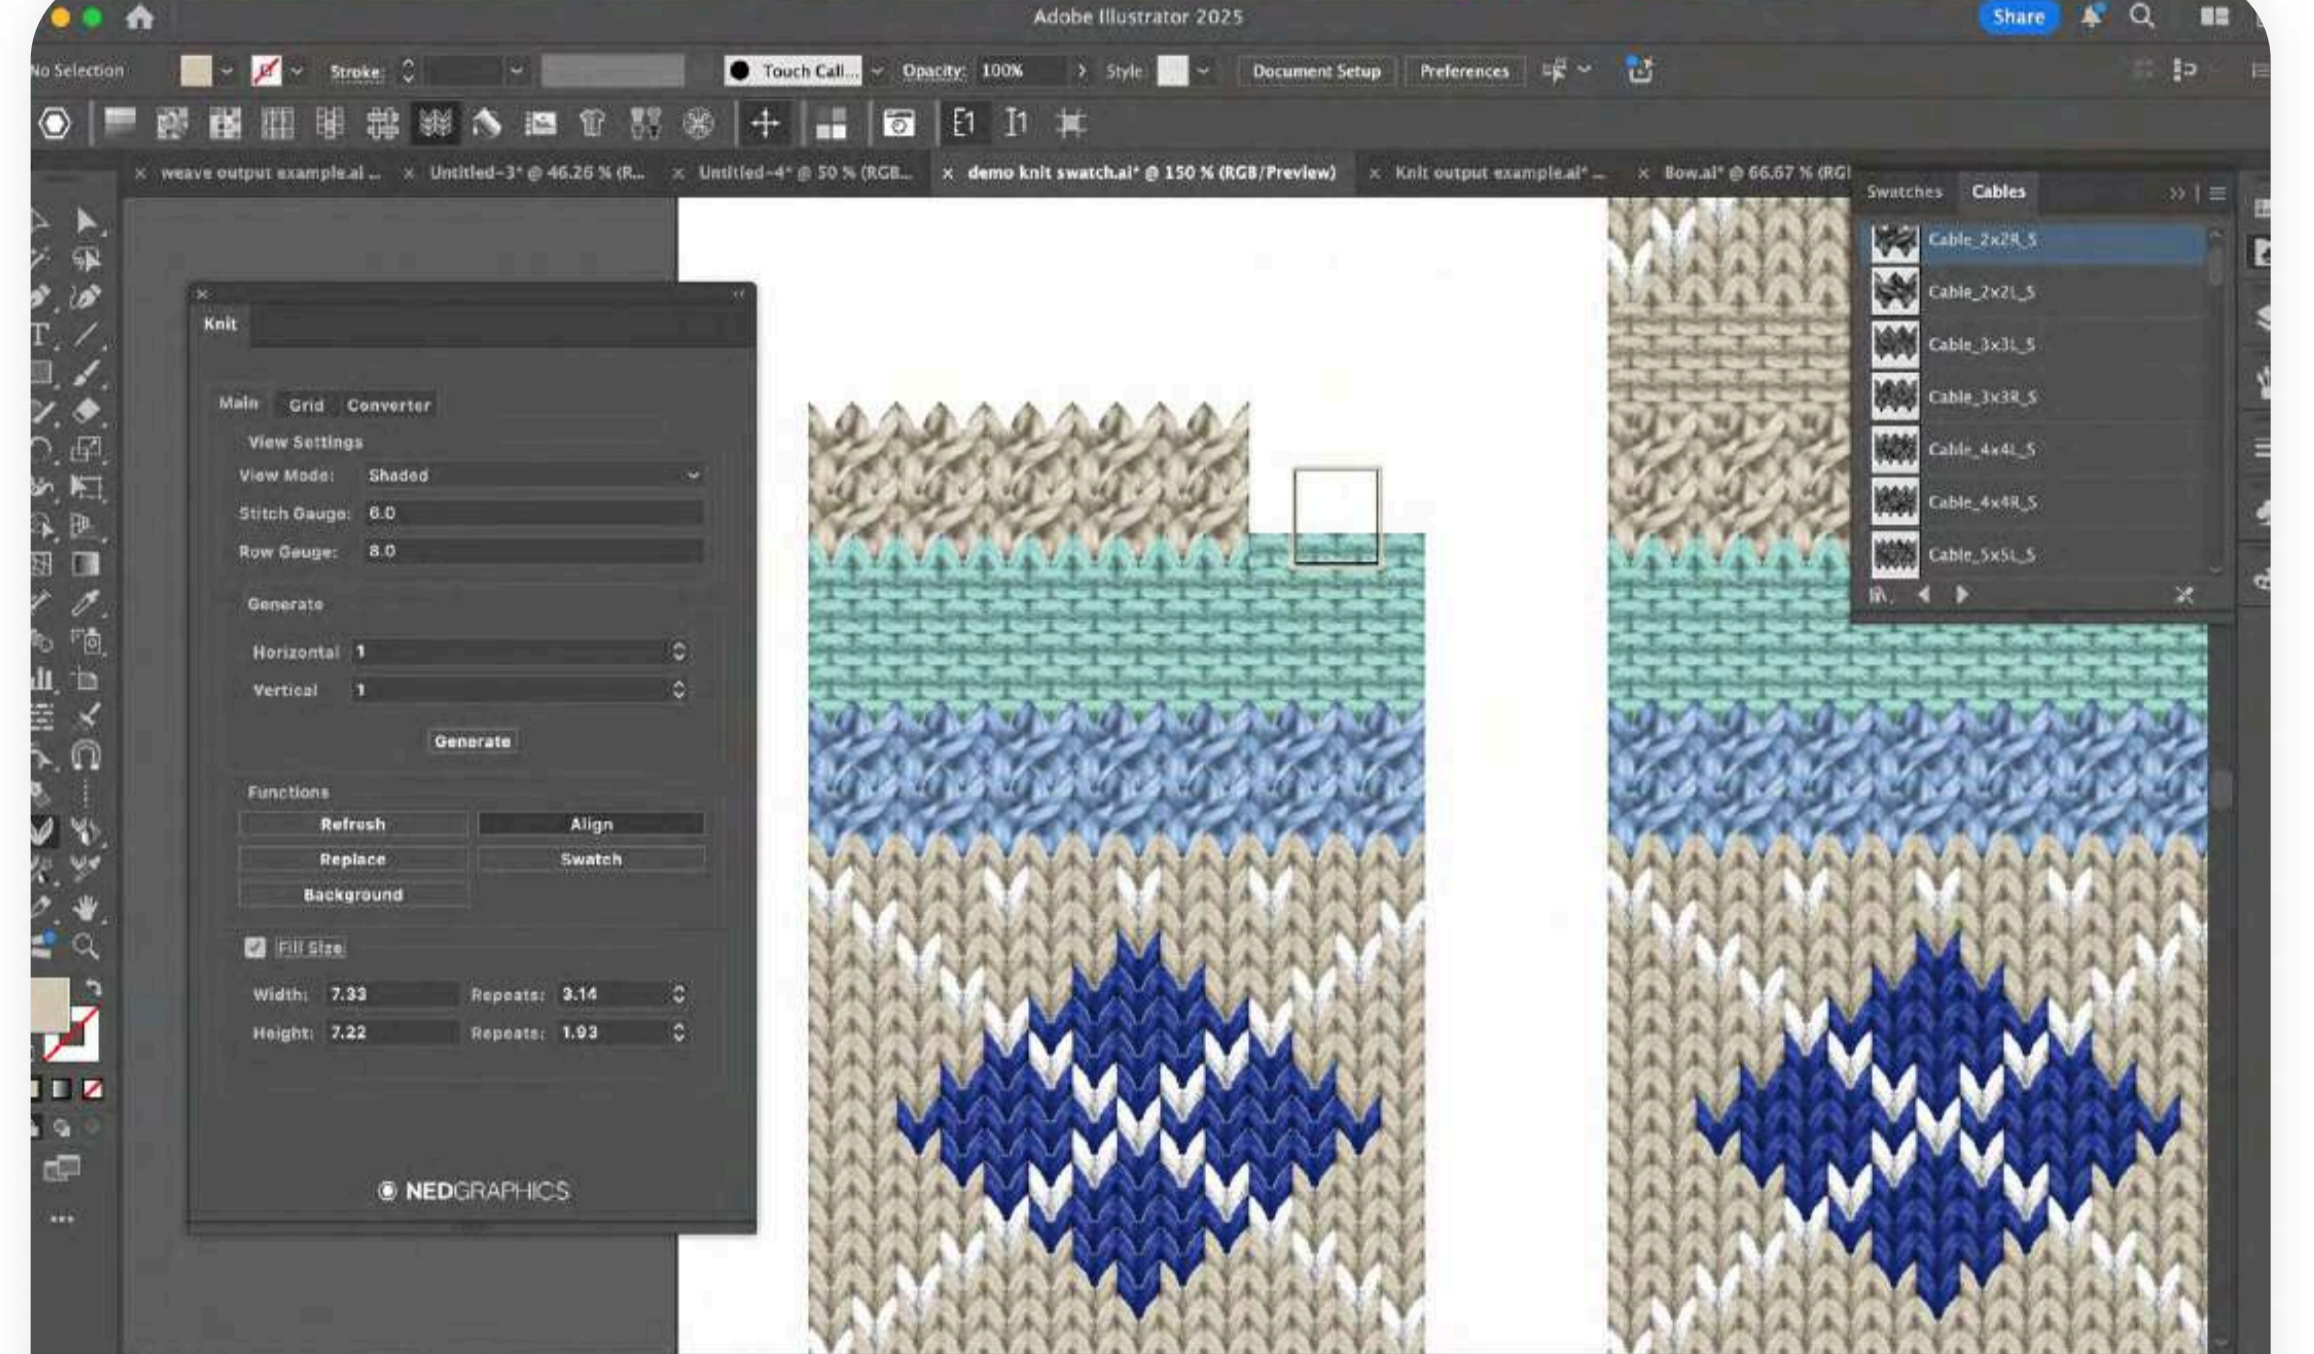

Elevating Fair Isle Pattern Design

Designing a Fair Isle pattern manually in Adobe Illustrator is a timely process. Without the **NedGraphics Knit for Adobe Illustrator**, designers must draw individual knit stitches using the Shape Tool, copy and paste them to build out the design area, and manually add unique stitches like purls or laces. This approach is not only time-consuming but also repetitive.

The **NedGraphics Knit for Adobe Illustrator** streamlines this workflow, reducing the time required for Fair Isle pattern design. Designers can bypass the laborious process of building individual stitches thanks to an extensive library of ready-made knit stitches. The solution allows patterns to be completed in under 20 minutes, offering tools that simplify and elevate the design experience:

Choose between three visual modes—shaded, flat, or color chart—to optimize both design and rendering expectations.

Effortlessly adjust stitch types, gauge sizes, and view modes with just a click.

By automating the most tedious tasks, the Knit frees designers to focus on innovation and creativity, transforming Fair Isle pattern design into a faster, more efficient, and more precise process.

Highlights and Benefits

- ✓ **Time Savings:** Create Fair Isle patterns 5x faster, reducing hours of manual work to minutes.
- ✓ **Ready-Made Stitches:** Access an extensive library of knit stitches, eliminating the need to build each stitch individually.
- ✓ **Versatile Design Options:** Optimize designs with three visual modes—shaded, flat, and color chart—for enhanced flexibility.
- ✓ **Precision Tools:** Easily adjust stitch types and gauge sizes to meet technical requirements.
- ✓ **Creative Freedom:** Spend less time on repetitive tasks and more time innovating and refining designs.

Simplifying Colorway Creation

Manually creating colorways in Adobe Illustrator can be a labor-intensive and error-prone process. Without the **NedGraphics Knit for Adobe Illustrator**, designers must trim the artwork to match the actual repeat, create a pattern swatch, and use the Recolor Tool to adjust colors. This method demands extensive manual effort, with each colorway taking up to an hour to complete. The repetitive nature of these tasks not only slows down the workflow but also increases the risk of inconsistencies across variations.

The **NedGraphics Knit for Adobe Illustrator** revolutionizes colorway creation, making the process faster and significantly more intuitive. Designers can easily manage palettes and streamline the recoloring process to explore multiple color variations effortlessly. The **Colorist** feature enhances efficiency by generating professional colorway presentations with templates, instantly ready for client review. Additionally, Color Utilities simplifies workflow by allowing swatches to be sent directly to the color swatch panel for quick application as fills.

This automated approach saves valuable time, ensures consistency across designs, and empowers designers to experiment with bold and innovative color palettes, fostering creativity without the burden of repetitive tasks.

Highlights and Benefits

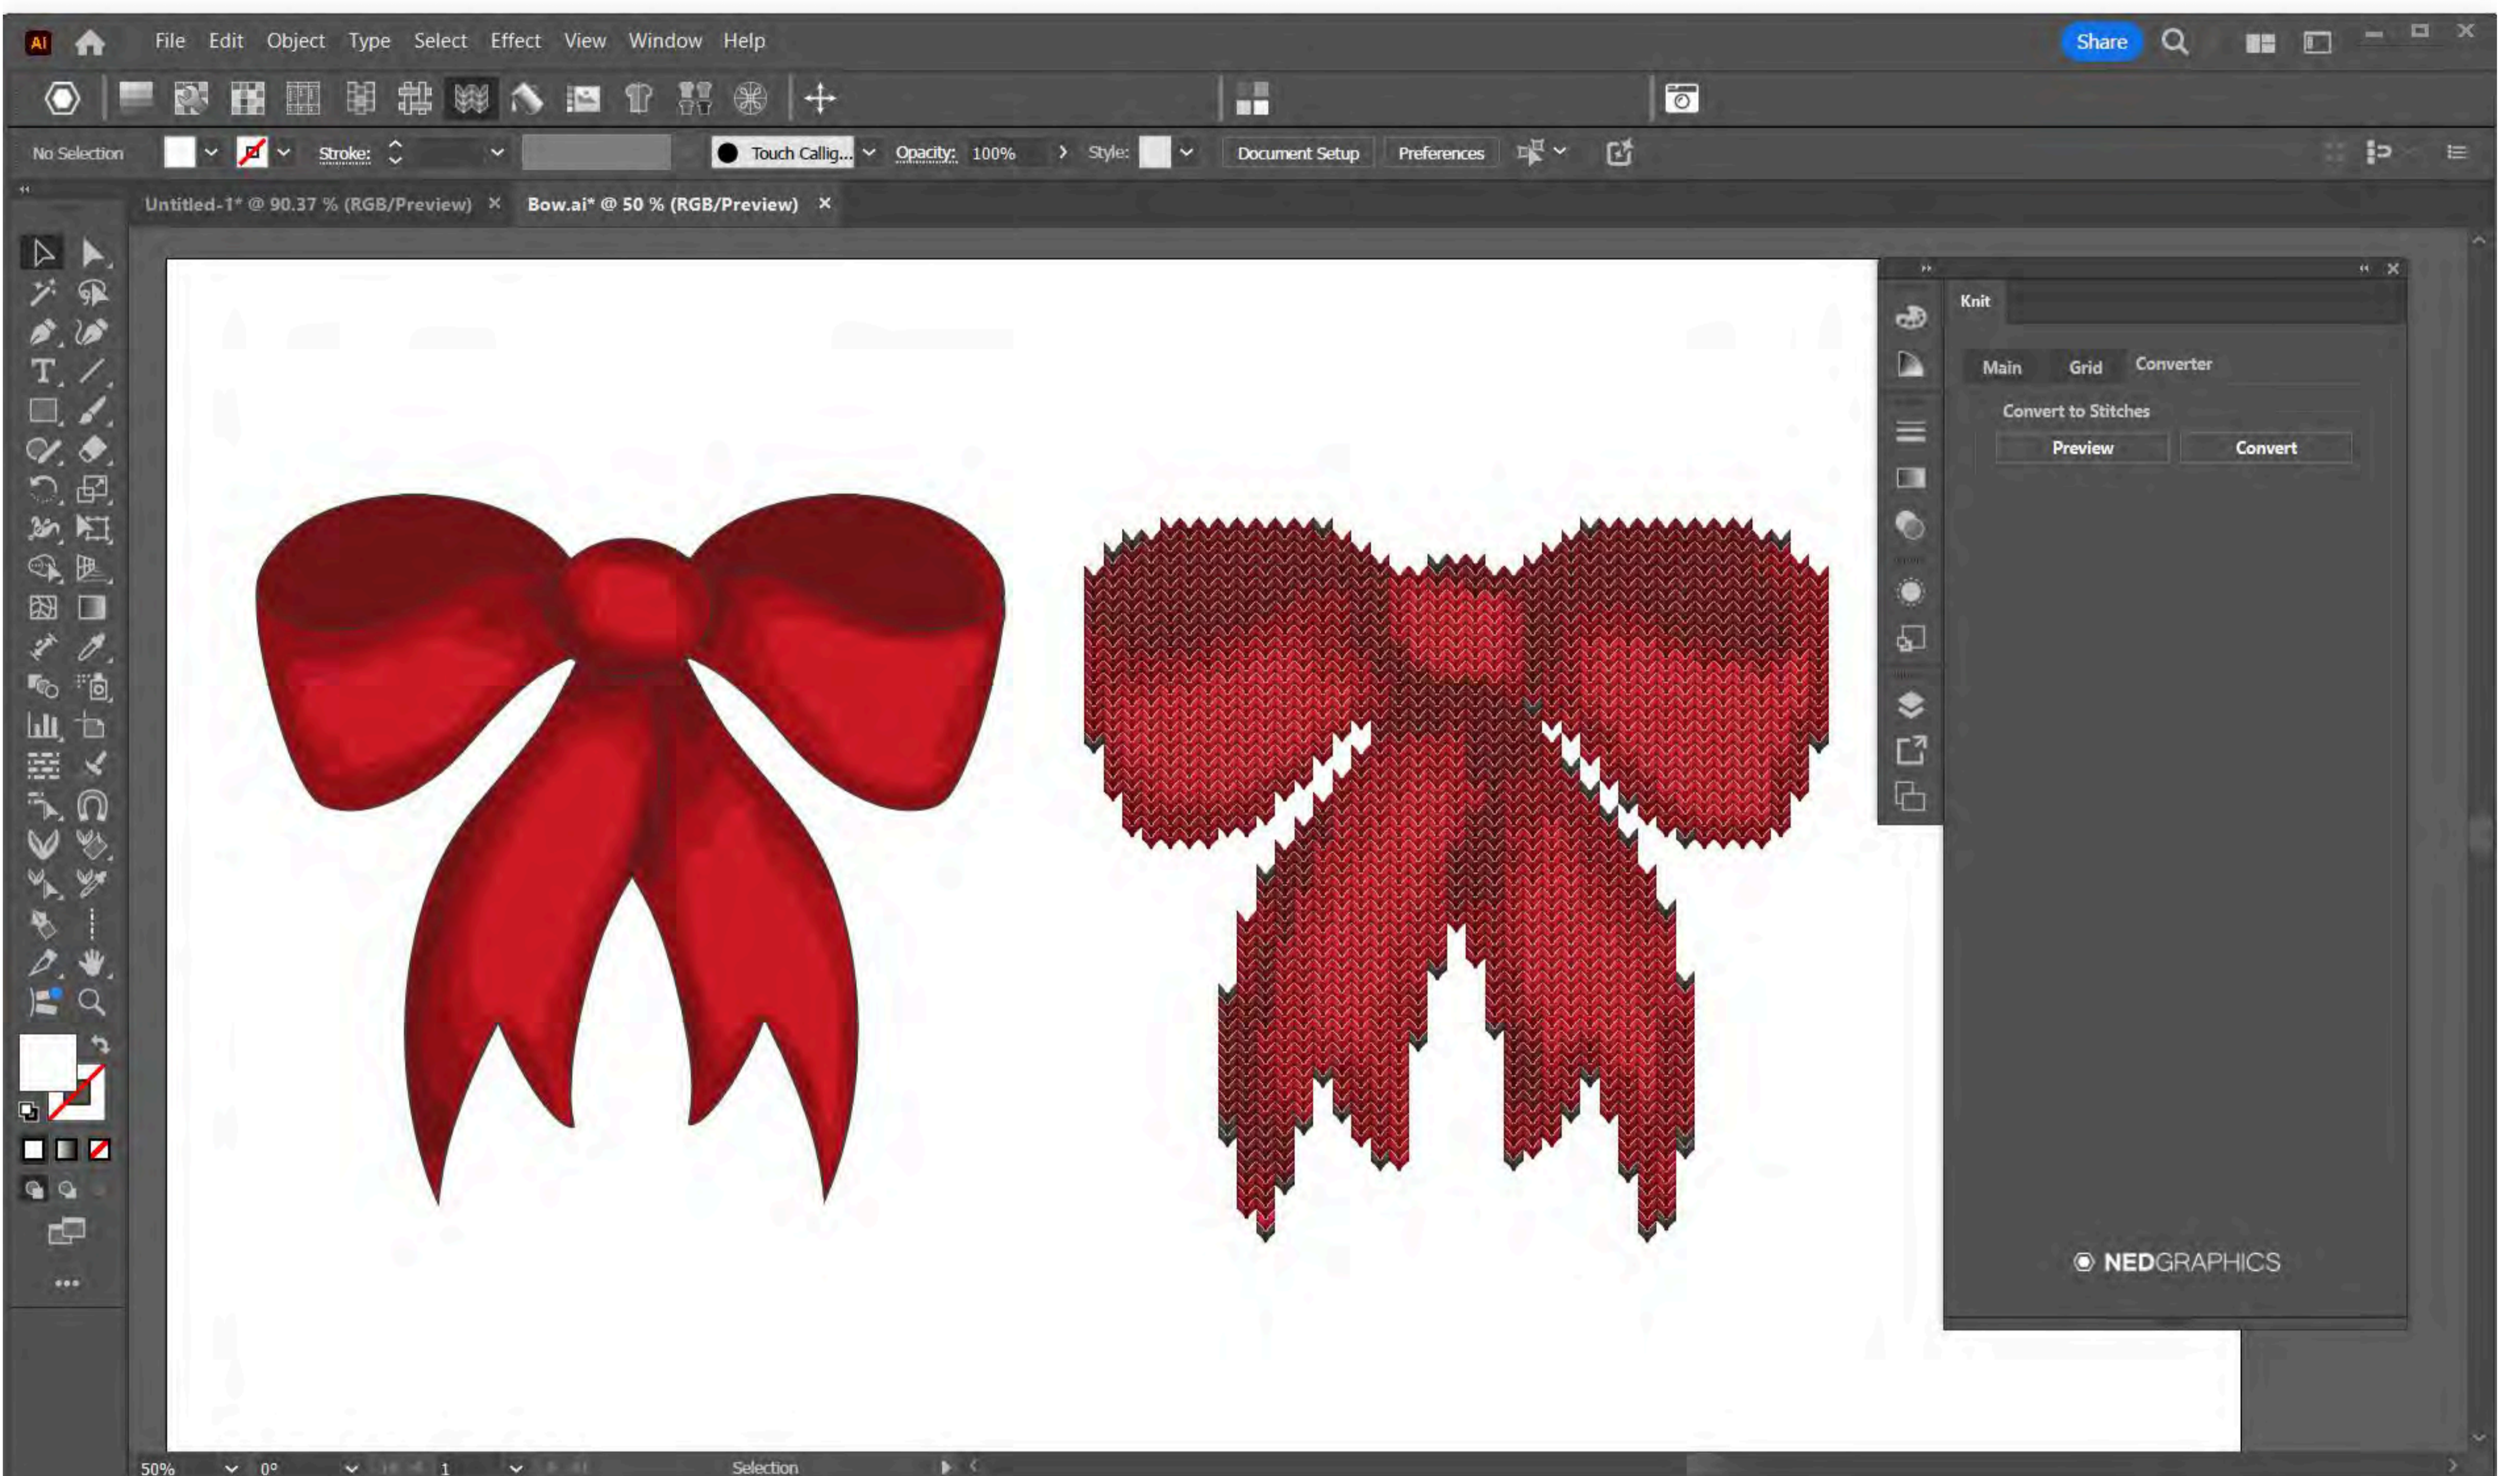

- ✓ **Dramatic Time Savings:** Reduce the time required for colorway creation by 6x, completing tasks in minutes instead of hours.
- ✓ **Automated Recoloring:** Use the Palette Utility Tool to pitch and recolor designs effortlessly.
- ✓ **Professional Presentations:** Instantly generate polished colorway presentations with templates using the Colorist feature.
- ✓ **Streamlined Workflow:** Send swatches directly to the color swatch panel for quick and efficient application.
- ✓ **Creative Exploration:** Free up time to experiment with bold palettes and refine designs without the distraction of tedious manual adjustments.

Bonus Feature: Convert Art to Knit

One of the standout features of the **NedGraphics Knit for Adobe Illustrator** is the **Converter Tab**, a tool that redefines what's possible in knit design. This powerful feature allows designers to transform any artwork—whether raster or vector—into knit stitches in under **1 minute**. Whether you're creating intricate intarsias or converting a vector stripe design into a knit pattern, the Converter Tab streamlines the process, making it both fast and intuitive.

The versatility of this tool opens up endless creative possibilities. Designers can experiment with bold, innovative techniques that were once time-consuming or impractical. By eliminating the need for manual redrawing and scaling, the Converter Tab gives knit designers the freedom to push boundaries and explore new styles effortlessly.

This seamless integration of automation and creativity not only saves time but also inspires innovation, enabling designers to expand their craft and elevate their designs to new heights.

Converter Tab

Highlights and Benefits

- ✓ **Rapid Transformation:** Convert any raster or vector artwork into knit stitches in under **1 minute**.
- ✓ **Versatility:** Seamlessly create intricate intarsias or turn vector stripe designs into stunning knit patterns.
- ✓ **Creative Possibilities:** Push boundaries and explore innovative techniques effortlessly.
- ✓ **Time Efficiency:** Eliminate manual redrawing and scaling, saving hours of work.
- ✓ **Enhanced Innovation:** Focus on refining and experimenting with designs instead of labor-intensive processes.

The NedGraphics Knit plug-in for Adobe Illustrator revolutionizes the way knit patterns are designed, offering unparalleled speed, precision, and efficiency. By automating tedious tasks, enhancing accuracy, and unlocking limitless creative possibilities, this plug-in empowers designers to focus on what truly matters—creating innovative, high-quality designs that stand out.

Discover the Difference

Take your knit designs to the next level with the NedGraphics Knit for Adobe Illustrator. Experience unparalleled speed, precision, and creative freedom as you transform your workflow and bring your knit creations to life. Explore the plug-in today!

About NedGraphics

NedGraphics is a leading developer of CAD software solutions created specifically for apparel and retail, home furnishings, flooring design and various other textiles. NedGraphics products allow designers to exercise full creative freedom while improving efficiency, productivity and accuracy to create production-ready artwork.
